

Explanatory one pager Super_Tony and Playlist_God by My Amigx Lab.

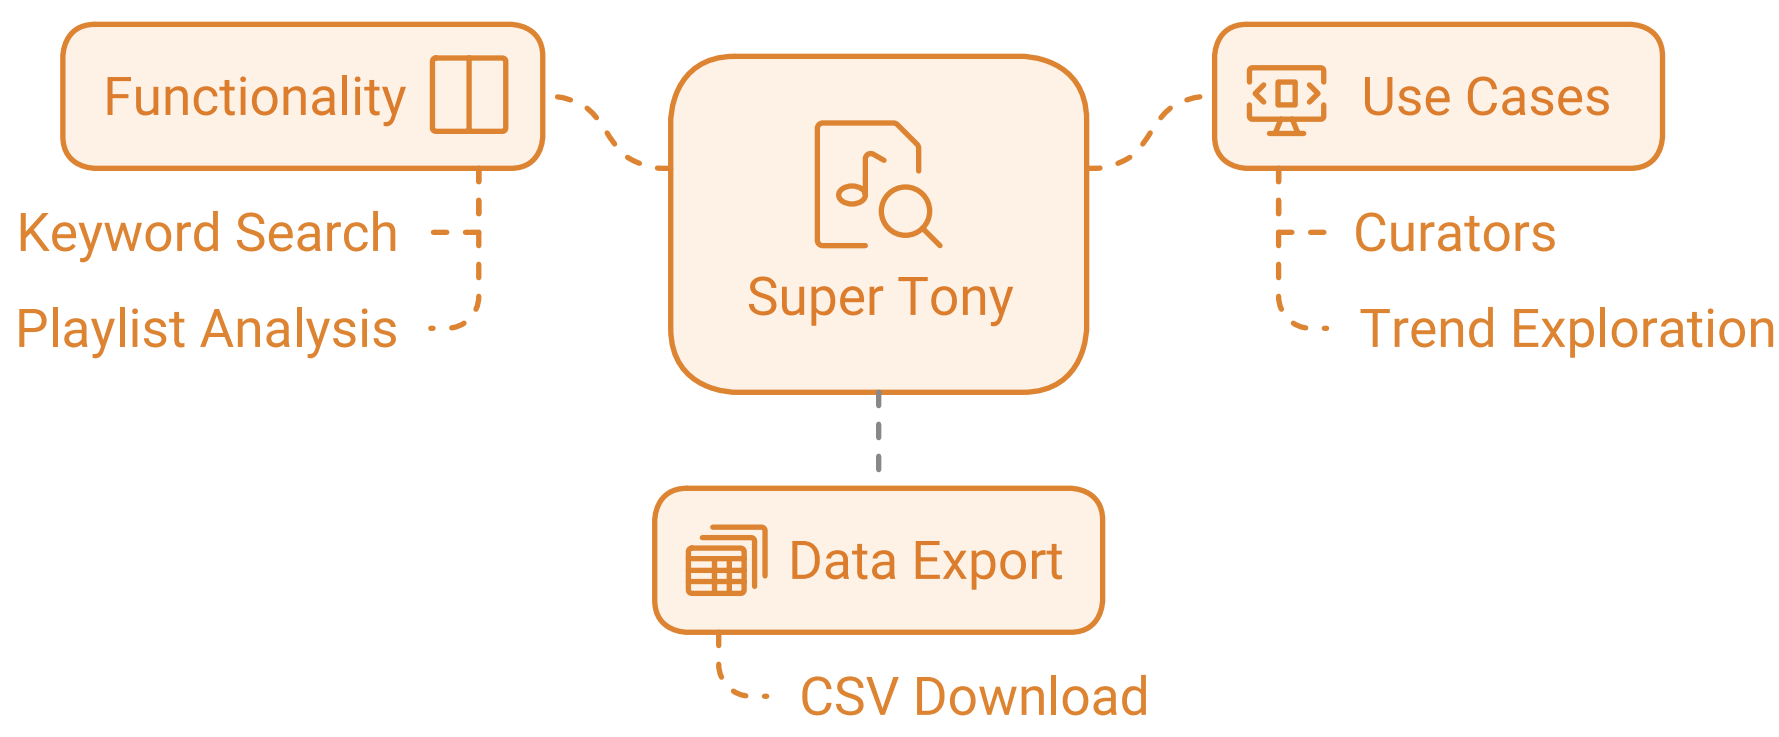

This document provides an overview of two innovative tools designed By My Amigx Lab to assist curators, artists, managers and record labels in creating playlists on Spotify (some functions apply to LastFm and Deezer, but the core is focused on Sopotify). The first tool, Super Tony, is engineered to fetch songs from top playlists based on specific search keywords. The second tool, Playlist God, utilizes the data gathered by Super Tony to build and upload playlists directly to the user's Spotify profile. Together, these tools streamline the playlist creation process, making it easier for curators to discover and compile music.

Which tool to use?

Super Tony

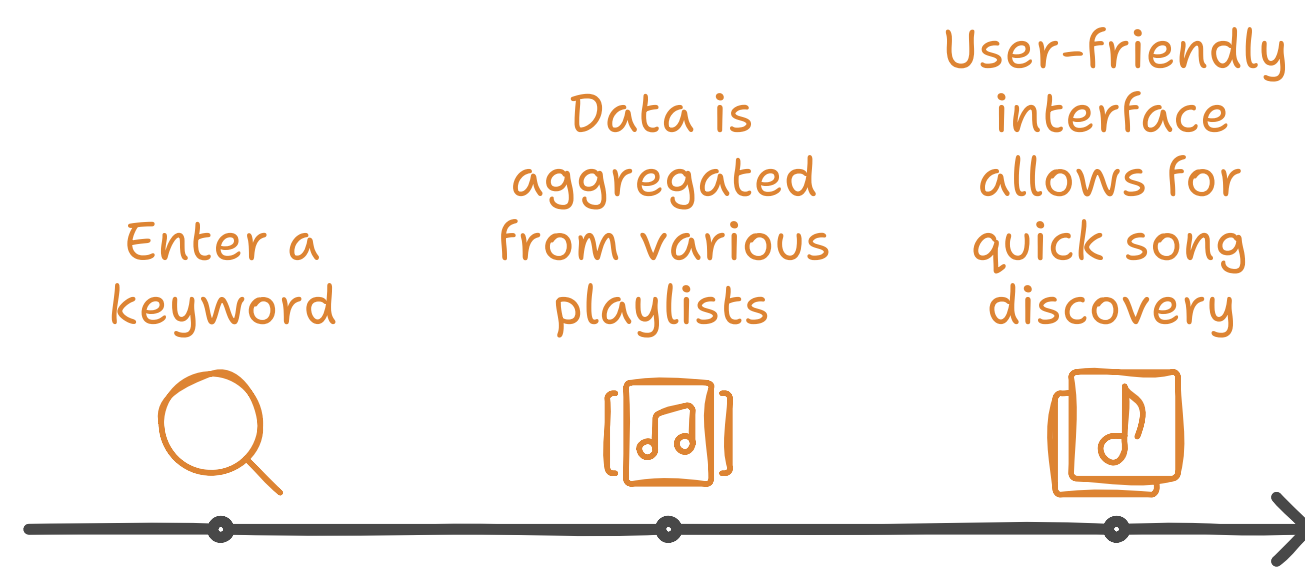

Super Tony is a powerful tool that allows users to search for songs using keywords. By analyzing the top playlists across Spotify, Super Tony fetches relevant tracks that match the search criteria. This tool is particularly useful for curators looking to explore popular music trends or find hidden gems within specific genres or themes. You can download the fetched data in a CSV file for further analysis.

Key Features:

- **Keyword Search:** Enter a keyword to discover songs from top playlists.
- **Data Aggregation:** Pulls data from various playlists to ensure a comprehensive selection of tracks.
- **User-Friendly Interface:** Designed for ease of use, allowing curators to quickly find the songs they need.

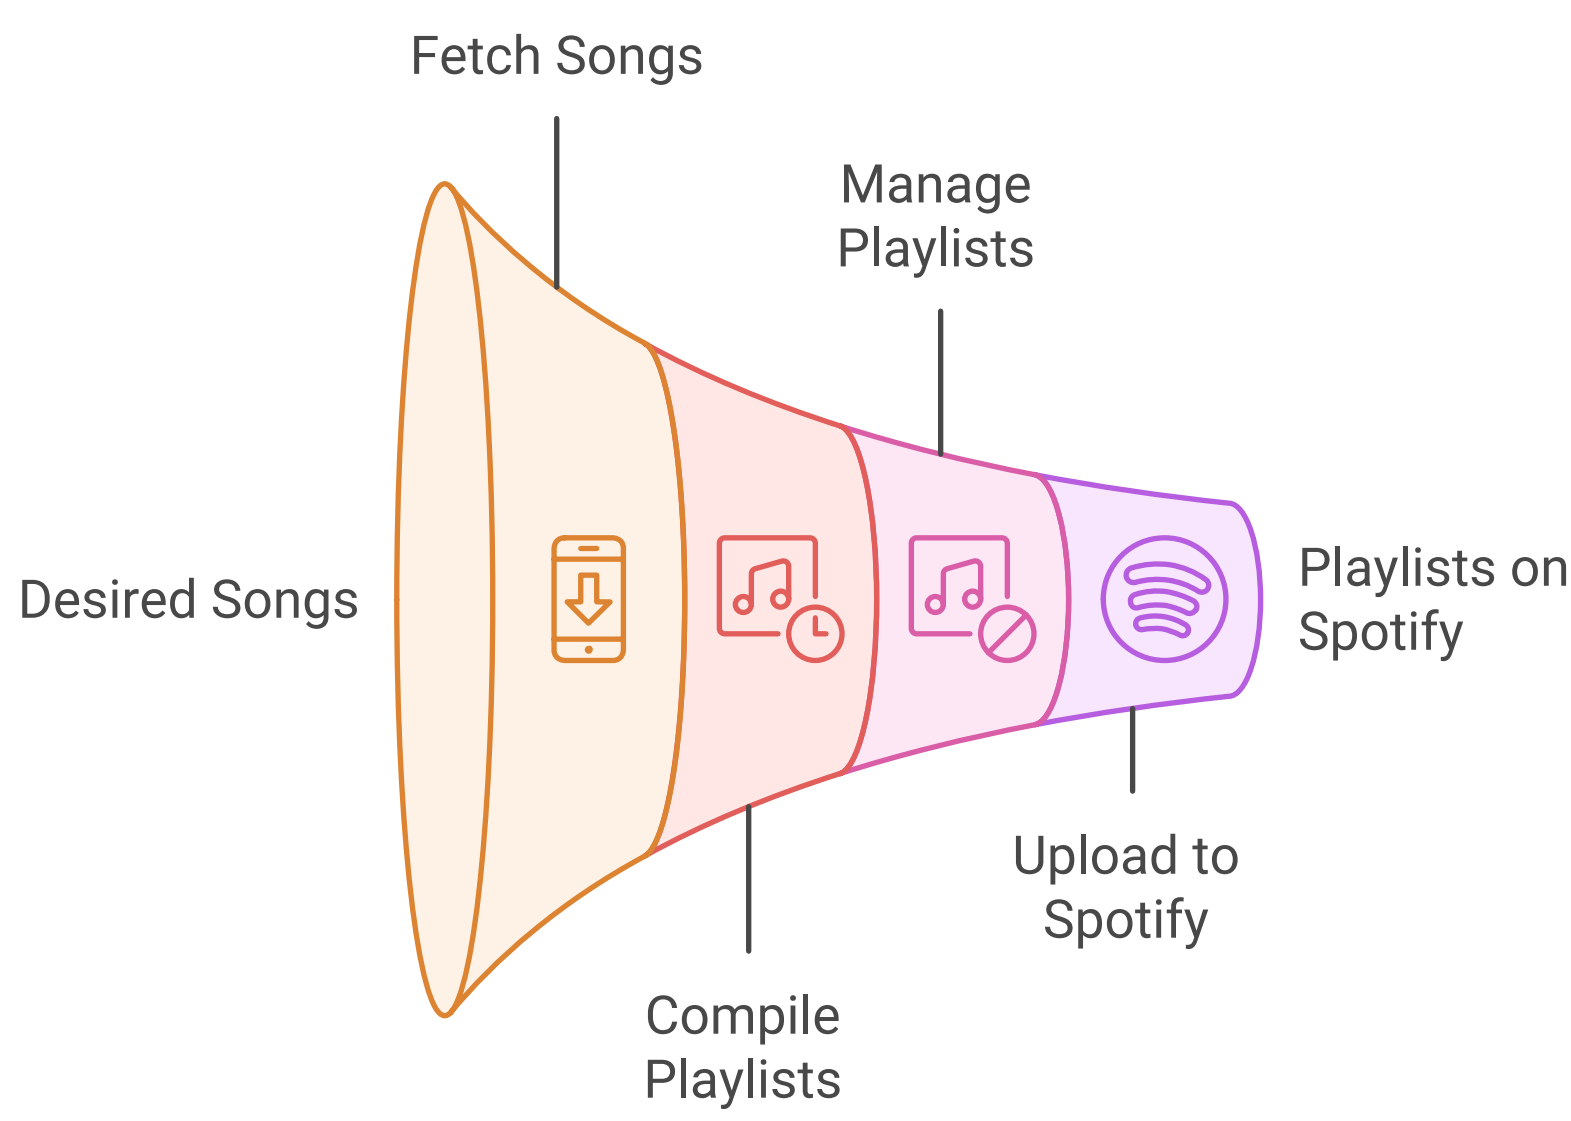

Find Songs with Ease

Playlist God

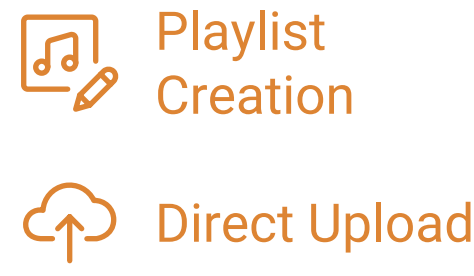

Once Super Tony has fetched the desired songs, Playlist God takes over to create and manage playlists. This tool allows users to compile the songs fetched by Super Tony into cohesive playlists that can be uploaded directly to their Spotify profiles.

Song Management Funnel

Key Features:

- **Playlist Creation:** Automatically builds playlists using the songs selected by the user.
- **Direct Upload:** Seamlessly uploads the created playlists to the user's Spotify account.

Conclusion

Together, Super Tony and Playlist God form a dynamic duo that enhances the playlist curation experience on Spotify. By leveraging the strengths of both tools, curators can efficiently discover, compile, and share their musical creations with ease. Whether you're a seasoned curator or just starting, these tools are designed to elevate your playlist-making journey.

Playlist Curation Enhancement
